#### Evaluation of the Beyond Zero Campaign, an Initiative of Her Excellency Margaret Kenyatta the First Lady of the Republic of the Kenya

##### Introduction

In 2014, Her Excellency Margaret Kenyatta the First Lady in the Republic of Kenya resolved to make a positive contribution towards Kenya's health targets and the following year in January, she launched the Beyond Zero Campaign. The Campaign is a platform for providing high level leadership in ending new HIV infections amongst children, reducing maternal, child and new born deaths. It leverages on the convening power of the First Lady to complement on-going government and partners' initiatives in health.

The Beyond Zero Campaign Initiative is guided by a Strategic Framework for Engagement of the First Lady in HIV Control and Promotion of Maternal, Newborn and Child Health in Kenya (2013-2017). It provides an impetus for high impact catalytic interventions towards zero preventable deaths of mothers and children. Through this Framework, the key advocacy messages have been:

- Adequate skilled birth attendants to attend, educate and support women and their babies during pregnancy, childbirth and after birth
- Adequate HIV testing, prevention and treatment programs to reduce mother to child transmission of HIV
- 100% immunization coverage for all babies against childhood illness especially polio, pneumonia and measles among others.
- Adequate coverage in use of insecticide-treated mosquito bed nets to prevent malaria
- Exclusive breastfeeding for all infants for the first six months
- Awareness creation for cancer prevention and good healthy lifestyles among the citizens.

The Beyond Zero Campaign Initiative has made great inroads in profiling gaps in maternal, neonatal and child health including HIV. By focusing on increasing access to health through the delivery of mobile clinics the Campaign has mobilized stakeholders at different levels to increase investments to ending preventable deaths of women and children. It has demonstrated its high potential in spurring development in health and other determinants in Kenya. At design phase, the Initiative has sought to partly address the issue of access to health services and ensure that these services are accessible to very poor marginalized and hard reach people of Kenya, through delivery of the mobile clinics.

The Campaign has benefitted from the new governance arrangements that bring the government closer to the people. With a devolved structure barely four years old, this governance system has transferred the health function to the counties. The implementation model is fashioned around the County infrastructure as they are the recipients of the mobile clinic led by the Governor and the County Health Management Team. The engagement, transfer of ownership and management of the mobile clinic is cemented with signing of an MOU between the County Government, national

government Ministry of Health and Beyond Zero Campaign during the delivery the clinic. The MOU outlines key roles and responsibilities for each party. Whereas the county governments determine its security, allocation of staff, schedule in sub counties, availability of supplies and drugs and its budgetary allocation for day-to-day operations; the Governors Spouses are the Beyond Zero ambassadors at county and thus advocate for uptake of health services.

### **Objectives of the Assignment**

The 1<sup>st</sup> Edition of the Strategic Framework 2015-2017 is ending next year and good practice necessitates that that programs such as the Campaign are evaluated to allow for self-reflections. The Initiative espouses learning to be an essential component to continuously inform its program design and implementation, to provide insights on how to improve on its mandate to the most vulnerable populations and adapt in order to remain relevant. Good documentation, leads to better programs, better accountability to donors, and a better understanding of "what works." The Beyond Zero Secretariat, through a consultant, would like to evaluate this Initiative and also come up with new strategic framework that will inform the next five years.

  - How has the Initiative positively or negatively impacted on the general maternal and child health indicators in Kenya? How does the current model of the Campaign influence or affect or interact with existing health systems work? How has the initiative been able to help the national and county ministries of health deliver on their specific mandates?
  - Have the key advocacy messages (as outlined previously) transformed health behaviors of Kenyans? What has been the return of investment for inputs against outputs? How many lives have been saved or communities empowered through this Initiative?
  - What aspects of the campaign have enhanced policy and agenda setting for women and children? How are other stakeholders been influenced in terms of resources, advocacy etc? How has the Campaign impacted emerging coalitions of support and potential for enhancing them for transformation?
