SECTION II: INFORMATION TO TECHNICAL ASSISTANTS (TAs)

2.1 Introduction

- 2.1.1 The National AIDS Control Council will select the Technical Assistants among those submitting the proposals or those who respond to the invitation for proposals in accordance with the method of selection detailed under this section and consistent with the regulations.
- 2.1.2 The Technical Assistants are invited to submit a technical proposal and a financial proposal for consulting services required for the assignment stated in the letter of invitation (Section I)
- 2.1.3 In the assignment where the procuring entity intends to apply standard conditions of engagement and scales of fees for professional services, which scale of fees, will have been approved by a relevant authority, a technical proposal only may be invited and submitted by the Technical assistants. In such a case the highest ranked individual Consulting individuals in the technical proposals shall be invited to negotiate a contract on the basis of the set scale of fees. The technical proposals will be the basis for contract negotiations and ultimately for a signed contract with the selected individual.
- 2.1.4 The Technical Assistants must familiarize themselves with local conditions as regards the assignment and take them into account in preparing their proposals. To obtain adequate information on the assignment and on the local conditions, Consulting individuals are encouraged to liaise with the procuring entity regarding any information that they may require before submitting a proposal.
- 2.1.5 The client will provide the inputs and services specified in the special conditions of contract needed to assist the Technical assistant to carry out the assignment.
- 2.1.6 The cost of preparing the proposal and negotiating the contract including any visit to the procuring entity are not reimbursable as a direct cost of the assignment. The procuring entity is not bound to accept any of the proposals submitted.
- 2.1.7 The procuring entity's employees, committee members, board members and their relative (spouse and children) are not eligible to participate in the tender.

2.2 Clarification and amendment to the RFP documents

- 2.2.1 The individual may request clarification of any of the RFP documents not later than Three (3) days before the deadline for the submission of the proposals. Any request for clarification must be sent in writing by post, fax or email to the procuring entity's address indicated in the special conditions of contract. The procuring entity will respond by post, fax or email to such requests and will send written copies of the response (including an explanation of the query but without identifying the source of inquiry) to all individual Consulting Technical assistants invited to submit proposals.

- 2.2.2 At any time before the deadline for submission of the proposals, the procuring entity may for any reason; either at its own initiative or in response to a clarification requested by an intended Technical Assistants amends the RFP. Any amendment shall be issued in writing, fax or email to all invited individual Consulting individuals and will be binding on them. The procuring entity may at its discretion extend the deadline for the submission of the proposals.
- 2.2.3 Clarification of tenders shall be requested by the tenderer to be received by the procuring entity not later than 3 days prior to the deadline for submission of tenders.
- 2.2.4 The procuring entity shall reply to and clarifications sought by the tenderer within 1 day of receiving the request to enable the tenderer to make timely submission of its tender.

2.3 Preparation of proposals

- 2.3.1 The individual's proposal shall be written in English language.
- 2.3.2 In preparing the Technical proposal, the individuals are expected to examine the documents consisting the RFP in detail. Material deficiencies in providing the information requested may result in rejection of a proposal.
- 2.3.3 While preparing the Technical proposal, the individual must give particular attention to the following:
- (a) If a Technical Assistant considers that he/she does not have all the expertise required for the assignment he/she may suggest in the proposals other individual(s) who will assist in the assignment but they will not be party to the contract for the purpose of the performance of the assignment. Technical Assistants will not propose other individuals invited to submit proposals for the assignment. Any Technical Assistants in contravention of this requirement shall automatically be disqualified.
 - (b) For all the staff who will be involved in the exercise of the proposals to individuals must indicate their responsibility in the assignment and also the staff time as necessary.
 - (c) The curriculum vitae (CV) of the staff proposed must be submitted with the proposal.
- 2.3.4 The Technical proposal shall provide the following information;
- (a) The Technical Assistants -a brief of any recent experience of assignment of a similar nature. For each assignment the brief should indicate the profiles of staff involved, contract amount and the Technical assistant's involvement.
 - (b) Any comments or suggestions on the Terms of Reference and a list of service and facilities requested to be provided by the procuring entity.
 - (c) A description of the methodology and work plan for performing the proposed assignment.
 - (d) Any additional information requested in the special conditions of contract.

2.3.5 The Technical proposal shall be separate from the financial proposal and shall not include any financial information.

2.4 Financial proposal

2.4.1 In preparing the financial proposal, the Technical Assistants s are expected to take into account the time required in completing the assignment as outlined in the RFP documents. The financial proposal will therefore be quoted in fees per day or month. The financial proposal may also include other costs as necessary, which will be considered as reimbursable.

2.4.2 The Financial proposal should include the payable taxes.

2.4.3 The fees shall be expressed in Kenya Shillings.

2.4.4 The Financial proposal must remain valid for 90 days after the submission date. During this period the Technical assistant is expected to keep available at his own cost any staff proposed for the assignment. The Procuring Entity will make best efforts to complete negotiations within this period. TERMS OF REFERENCE

June 2017

Technical Assistant (TA) To Model HIV & AIDS Prevention Return On Investment (ROI) Analysis and Efficiency Levels on the Adolescent and Youth; and Provide Optimal Investment Model for Stakeholders in Kenya Based On Combination

Terms of Reference:

Technical Assistance (TA) to Undertake Return on Investment for HIV Prevention Programmes Among Adolescence and Young People

1.1 Background

The Kenya AIDS Strategic framework 2014/15-2018/19(KASF) recognizes adolescents and young people as a priority population for the HIV response. Currently, infection rate for the adolescents and young people accounts for 50% of all new infections. The age group is however threatened given that only 13% of those living with HIV and AIDS are on ART. The trend therefore as observed, means that the country's economy is in danger of lose of labor force and increased health expenditures both on the prevention and management of the youth and adolescents but also on the high probabilities leading to infection from the increasing Non-Communicable Diseases (NCDs). To manage these possible health catastrophes, The National AIDS Control Council (NACC) launched Kenya Fast track Plan to end HIV and AIDS among adolescents and young people that resulted from a consultative process with different ministries and agencies of the national government, county government, development and implementing partners, civil society, private sector and adolescents and young people living with HIV. Deriving strategies, targets and priority interventions from the KASF, Global ALL IN targets and the Kenya HIV prevention revolution map, the Fast-track Plan is a two year implementation plan (running within the medium term of KASF) outlining a range of initiatives to be undertaken by relevant Ministries, counties and development agencies through a consultative approach.

The objectives of the fast track plan were:

1. To reduce new infections among adolescents and young people by 40%
2. To reduce AIDS related deaths among adolescents and young people by 20%
3. To reduce stigma and discrimination among adolescents and young people by 25%

1.2 Definition of adolescents and young people and general population

Kenya defines adolescents and young people as those aged 10-24 years while general population include all targeted persons at risk of new infections Although it varies by country, this category is

generally sub-divided into adolescents (10-19 years), young people(15-24 years) and the population of over(25+) years

Adolescents and Subpopulations

Most-at-risk young people are:

- Male and female injecting drug users (IDUs) who use non-sterile injecting equipment;
- Males who have unprotected anal sex with other males;
- Females and males who are involved in sex work, including those who are trafficked for the purpose of sexual exploitation and have unprotected (often exploitative) transactional sex; and or Males who have unprotected sex with sex workers.

Adolescents and young people vulnerable to HIV include, but are not limited to, those who:

- Are peers of most-at-risk young people;
- Have parents or siblings who inject drugs or sell/exchange sex;
- Live without parental care (on the streets or in institutions) and/or lack protection, or live with older relatives or guardians or in dysfunctional families;
- Have dropped out of school or have limited access to information and education;
- Use substances (alcohol and other drugs) that may impair their judgment;
- Have limited access to health and social services due to lack of identity documents;
- Live in extreme poverty or are unemployed;
- Have been forcibly displaced through war/conflict (internally and externally), or have migrated between rural and urban areas or outside of their country of origin in search of employment (because of forced labor or for sexual exploitation);
- Live in broken communities and in situations where social and sexual norms regulating behavior are non-existent or loose.
- Live in areas of high HIV prevalence;
- Are socially excluded
- The general Population vulnerable towards HIV Investments
- The country population is estimated at 42 billion with 58% of the population aged above 15 years, thus vulnerable to HIV infection and related co-infection.
-

1.3 The Return on Investments and Efficiency analysis on Prevention among Youth and Adolescents and general population

To assess the returns to investment and efficiency on prevention for the HIV/AIDS response among the youth and adolescents, and general population, three scenarios are key for consideration:

- i. A baseline scenario which keeps prevention and other service coverage rates constant at their 2016 levels (this prevention takes in to account the current population infected and those at high risk,
- ii. A scenario that is based on the “investment framework” described in the recent “Goals” report (Stover, 2014), and an analysis that starts out from the “Goals” analysis, but is modified to capture the gains in reducing HIV incidence envisaged under the “prevention revolution” roadmap among the youth and adolescents.

- iii. The efficiency analysis of the various investments works on different prevention models and possible impact to the national and county economic growth levels.

1.4 Justification for the Return on Investment and Efficiency Analysis

The economic and social consequences of delayed or non-investment on the prevention of HIV/AIDS among youth and adolescents may be evident from health consequences especially from the disease burden. This is taken into account by first describing HIV/AIDS among the youth and the adolescent and related general population as a risk to the prospect of a long and healthy life as well as a high health consumption avenue and reduced production variable, thus negatively affecting economic growth. Notably, investment to the target population allows discussion to some of the implications for individuals affected by HIV/AIDS. The advantage of disaggregating the target population is advised by the fact that generalized analysis does not fully capture the economic and social consequences if the burden of HIV/AIDS is distributed unequally across population groups.

Being an acute illness, lack of control and preventive measures, HIV and AIDS is likely to lead to a chronic disease if the target population is infected with NCDs. This hypothesis, therefore, provides an avenue for all stakeholders (government, private sector, development partners and households) to invest in preventive measures, whose rate of investments (ROI) should be determined.

1.5 Key Achievement from the Investment and efficiency Analysis

1.5.1 Key Achievement Target 1: Prevent new HIV infections among adolescents and young people and general population

HIV dynamics, 2015

- 98 adolescents and young people aged 15-24 year old get newly infected every single day
- Two thirds of the newly infected are girls and young women
- 3 times likelihood of girls aged 15-19 years to get newly infected with HIV compared with boys of the same age group
- 15-24 year olds account for 51% of all adult HIV infections
- 57% of young women and 64% of young men (15-24 yrs) have comprehensive knowledge about HIV
- 69% of young women and 54 % of young men (15-24 yrs) have been tested for HIV
- 1 in every 5 youths aged 15-24 years old reported sexual debut before the age of 15

Expected outcome

A Return on Investment and efficiency analysis will support long-term investment and sustained engagement in HIV prevention among adolescents and young people and the general population.

The investment would ensure:

- Provision of comprehensive, accurate and developmentally appropriate life-skills and sexuality education for attitude formation and decision making
- Intensification of HIV prevention to ensure maximum coverage to slow down the epidemic
- Tailored HIV comprehensive programming taking cognizance of the value of multi-sectoral approaches while linking up with poverty reduction, sexual reproductive health, age appropriate sex education

- Strengthen social protection systems to address social and economic drivers of vulnerability to HIV for adolescents and youth, particularly girls and young women
- Evidence Based Interventions informed by adolescents and young people sex and age disaggregated national and county data
- Community participation including parental engagement in the HIV prevention efforts for sustainability and achievement of impact

1.5.2 Key Achievement Target 2: Dramatically reduce AIDS related deaths among adolescents and young people and the general population

HIV dynamics

- 1 out of 5 People living with HIV is 10-24 years old
- 1 in 7 AIDS related deaths occur among adolescents and young people
- AIDS is the leading cause of death among adolescents and young people
- 28.8% ART coverage among adolescents and young people

Expected outcome

A Return on Investment analysis on investment in adolescent/general population centered health services that can prevent Sexual and Reproductive problems, detect and treat them if and when they occur would lead to:

- Integrated and scaled up youth friendly HIV and SRH services
- Elimination of barriers to access for all young people and the general population
- Concerted efforts to achieve universal access for treatment need to focus heavily on access for adolescents and young people/general population and the transition from pediatric to adult care.
- Strengthened multi-sectoral efforts for young people to receive appropriate education about HIV prevention and treatment in schools emphasizing the need to increase accessibility to information and tools/commodities for HIV prevention through linkages and referrals between the schools and health facilities.

1.5.3 Key Achievement 3: Address Adolescents and Young people/general population HIV Stigma and Discrimination

HIV Stigma

- 2013 study indicated HIV Stigma Index in Kenya at 45%
- HIV Stigma higher among adolescents and young people

Expected outcome

An investment case would address the immediate and underlying causes of Stigma, whose ROI would verify costs related to:

- Lack of awareness and knowledge;
- Misconceptions around HIV transmission that lead to fear of acquiring HIV through everyday contact with infected people; and
- Values linking people with HIV to behavior considered improper and immoral.

- Participatory and interactive education at the community level engaging parents, teachers, community leaders, religious leaders, county government leaders etc;
- Behavior change communication (e.g., media campaigns, edutainment programmes);
- Institutional reform (e.g., addressing discrimination in workplaces, health care settings, schools and other institutions);

2.0 Terms of reference for the Consultant

In order to understand the market dynamics that will motivate stakeholders to invest in key priority prevention areas targeting adolescents and youth, a Return on Investment and efficiency that brings out a business case adoptable by both the private and public sector should be well analyzed. The four key objectives targeted include:

- i. To estimate the Return of Investment (ROI) and efficiency on Prevention on new HIV infections among adolescents and young people/general population (Adopt all prevention strategies/approaches)
- ii. Develop an optimal ROI based on econometric models (Based on optimization programming especially game theory modeling, Choice Modeling or the equivalent).
- iii. To estimate Return on Investment and efficiency for HIV Prevention programmes within the combined prevention framework
- iv. To estimate probabilities within which various stakeholders will invest in the various HIV Prevention programmes and possible costs of investment
- v. To develop key policy interventions that can be presented both locally and globally targeting stakeholders to invest in HIV prevention programmes for adolescents and youth

2.1 Specific tasks to be undertaken

The specific tasks for the consultants include, among others the following:

1. **Inception phase:** Develop an inception report detailing the key issues that will be explored in relation to preventive programmes and expectations for each objective, proposed methodology to be undertaken and format for the report detailing each objective
2. **Literature review, Data Collection, Analysis:** Undertake review of literature on various investment cases undertaken narrowed down to the adolescent and youth. The consultant will also undertake data collection and analysis for the different objectives as per the methodologies proposed
3. **Report writing:** A report that outlines key investment cases and their rate of return shall be developed. The reports shall be accompanied by policy brief tailored to different stakeholders targeted to invest in prevention programmes for adolescents and the youth

2.2 Recommended qualifications of the Return on Investment and Efficiency Consulting Exercise

We envision a team of 3 consultants undertaking the tasks described here. The required qualifications and experience for each are listed below.
