SECTION III - TERMS OF REFERENCE (TOR)

1. Background

The National AIDS Control Council (NACC) has been implementing a web-based research repository referred to as the ***Maisha Maarifa Research Hub*** that captures studies conducted in Kenya on Human Immuno-deficiency Virus (HIV), Sexual and Reproductive Health (SRH) and Tuberculosis (TB). The Hub has interactive functionalities that facilitate online access to research studies and participation in webinars and online forums by registered users. Development of the Research Hub was a key recommendation by the Kenya HIV Prevention Revolution Roadmap, the Kenya AIDS Strategic Framework (KASF) 2014/15 – 2018/19 and the Kenya HIV Research Agenda 2014/15 – 2018/19. The Kenya AIDS Strategic Framework (KASF) 2020/21 – 2024/25 has been developed with a thematic area on strengthening the use of strategic information, research and innovation; and the Research Agenda is being reviewed.

The Specific Objectives of the Hub include:

- i) Availing current local knowledge (research findings and best practices in programming) in a coordinated manner.
- ii) Promoting evidence-based policy formulation and programming.
- iii) Providing an interactive forum for practitioners, implementers and researchers.

The key potential uses of the Research Hub include, but are not limited to:

- i) Accessing research studies in various categories such as ***published, unpublished and ongoing research***.
- ii) Uploading of research work by registered and authorized users, particularly Researchers and Secretariats of Ethical Review Committees (ERC) that are a key source of the research studies.
- iii) Access to information on funding opportunities and scholarships.
- iv) Access to webinars for learning and dissemination of strategic information.
- v) Access to communities of practice for focused discussions and exchange of knowledge.
- vi) Access to information on key upcoming events such as symposia and conferences.
- vii) Submission of reports on approved research studies by Secretariats of Ethical Review Committees.

2. Technical Overview of the Research Hub

The Research Hub is a website coded in the *ASP.NET programming language* and uses *Structured Query Language (SQL) databases* to hold its data and information. The website and databases are hosted in a *Microsoft Windows Server* provided by *GoDaddy Inc.* whereas the domain name “*maishamaarifa.or.ke*” is provided by *Safaricom PLC.* Further, it provides a back-end user interface for use by an administrator and a front-end interface for use by the site’s visitors and users. Functionalities of these interfaces are described in the section i) and ii) below on “*Information Input*” and “*Information Output and Presentation*” respectively.

i) Information Input

The Hub has an administrator’s panel where various types of information ranging from research studies, webinar schedules, events and down-loadable images and documents can be uploaded. The panel has data entry screens with text input boxes, drop-down menus and date selection menus. Data entry screens include *research, documents and downloads, news and events, user management, webinars and portal content (funding opportunities, scholarships and infographics).* Some of the aforementioned data entry screens are also available for users registered on the platform, which allow them to upload their own work as well as utilize functionalities of the website such as engaging in Communities of Practice.

ii) Information Output and Presentation

Information output on the administrator’s panel is in the form of a dashboard showing basic statistics such as registered users, number of research studies uploaded, events and number of down-loadable documents. Data output on the users’ front end is in the form of pages with various display formats that include text, hyperlinks, images and buttons.

3. Overview of Upgrade of the Research Hub and Need for Visual Content

In order to expand the functionalities available on the Research Hub as well as improve its usability, an upgrade process is being undertaken. This process will create improvements on the look and feel and further define and improve functionalities available at various user tiers such as Administrators, Moderators, Secretariats of Ethical Review Committee and General Users. The Upgraded Research Hub will then require dissemination to users in order for them to be familiar with it as well as to attract new users and promote utilization of the research studies in informing policy and decision making and further strengthening coordination at national and county level. It is against this background that the NACC seeks a consultant to create visual content in the form of videos with narration in English that will be used in digital campaigns to sensitize users and publicize utilization of the Research Hub.
